BIOMANUFACTURING CONFERENCE 2025:
**PANELLIST FOR PRODUCT COSTS IN
CULTIVATED MEAT & SEAFOOD
PRODUCTION**

“

Yuki Hanyu got his Ph.D from Oxford University in 2010. In 2014, he founded "Shojinmeat Project", the world's first citizen science community for cell-based meat and cellular agriculture in Japan. Based on the low-cost cell culture technology developed there, he founded IntegriCulture Inc. in 2015 to commercialize cell-cultured meat. The company develops a B2B infrastructure that enables large and small entities of the food, cosmetics and materials sectors for cellular agriculture, by providing them necessary hardware, cells, cell-cultured serum, food-grade basal medium and other related services.
